WORK EXPERIENCE

EDILITICS

Software Developer Engineer (UI/UX Design) Intern   *Jun 2023 - Nov 2023*

- Managed the design, development, and implementation of UI components for the transformation module.
- Created and integrated reusable React components across the app.
- Collaborated with the team to improve the overall user experience and visual design of app.

PROJECT EXPERIENCE

AnswerSnap

ReactJS, WXT.dev, OpenAI, Tailwind CSS

- Screenshot questions, get instant AI answers, and simplify your studies effortlessly!

- Streamlined the learning process, reducing the need for extensive searching and enhancing productivity during study sessions.

Comment.ai

MongoDB, Express, ReactJS, NodeJS

- Created a MERN stack application with custom groupification and sentiment analysis of video comments specifically for YouTube creators.

- Offered content creators the ability to use advanced analysis to prioritize and reply to important comment groups.

- Efficiently manage comments with bulk actions like replying, hiding, and deleting.

DocMate

NextJS, Vanilla JavaScript, MongoDB, Python

- Built a software as a service (SaaS) which allows the easy integration of a chatbot with minimal coding into websites.

- Added the ability to add FAQs and starting questions, and provided chatbot training using PDFs or website link.

- Made deployment easier for users by allowing them to integrate the chatbot with just a quick copy and paste of code into their HTML.
